

Take the Office with You...

Temovi enables anywhere, anytime communications.

Temovi

Real-time Communications

Temovi cloud solutions not only delivers carrier – class telephony throughout the office and enterprise, it also enables employees on-the-go to stay connected feature rich apps for both Apple IOS and android connects smart phones and tablets to Temovi's telephony, voice conferencing, video conferencing and Smart Office collaboration services providing any in office experience from virtually anywhere.

PC, Mac, or tablets can replace or complement a traditional business phone. Use them in the office, in a Home Office or on the road; anywhere you have your computer, tablet or smart phone and Internet access or mobile data (VOMD) you will have a complete unified communications experience.

One click and the call is grabbed from the desk phone and transferred to the Temovi mobile app, quickly and seamlessly. Easily grab the call again from your desk phone or other client.

Phone & UC Services without a Desk Phone

PC and Mac clients can replace or complement a traditional business phone. Use them in the office, in a home office or on the road; anywhere you have your computer and Internet access you have a complete unified communications experience (an office VPN connection is not required).

Find co-workers using the built-in corporate directory, see their presence status, send/receive instant messages and make and receive voice and video calls. The client shares your business phone number, even if you also have a desktop phone number and/or a mobile client.

One Phone Number Simplicity

The demand for mobile enterprise communications is growing at record speeds as more of the workforce is working on-the-go or from remote offices. It's hard for organisations to keep users connected, to provide quality phone services and deliver advanced collaborative tools.

Temovi Business Cloud solves this communication gap by giving organisations the ability to deliver feature rich telephony and unified communications services directly to smartphones and tablets over Wi-Fi and 4G. Users have a single phone number that can be used simultaneously by a desktop phone as well as Windows, iOS, and Android clients – making it easy to work from anywhere.

Easy Conference Calls

The iOS and Android apps are integrated with the MeetMe conferencing service. Any time you host a call you'll see the names or caller-ID of each participant that joins (or leaves) the conference. You'll never wonder if someone is quietly listening in or waste your time taking a roll call or find out that "Bob" has dropped only after calling his name five times.

One Business Directory with Presence & IM

Temovi Cloud clients provides a single business directory that provides presence information and instant messaging. Easily see who is online, on the phone, away, or offline. Presence is built into every smartphone app, making it easy to see everyone's status and send them an instant message or make an audio or video call with just one touch.

Call Grabber - Take Your Call with You

We have all been in the situation where we are on a phone call at our desk but needed to leave and either had to leave the call, missing important information or had to be late for the next appointment. Call Grabber lets users take the call with them.

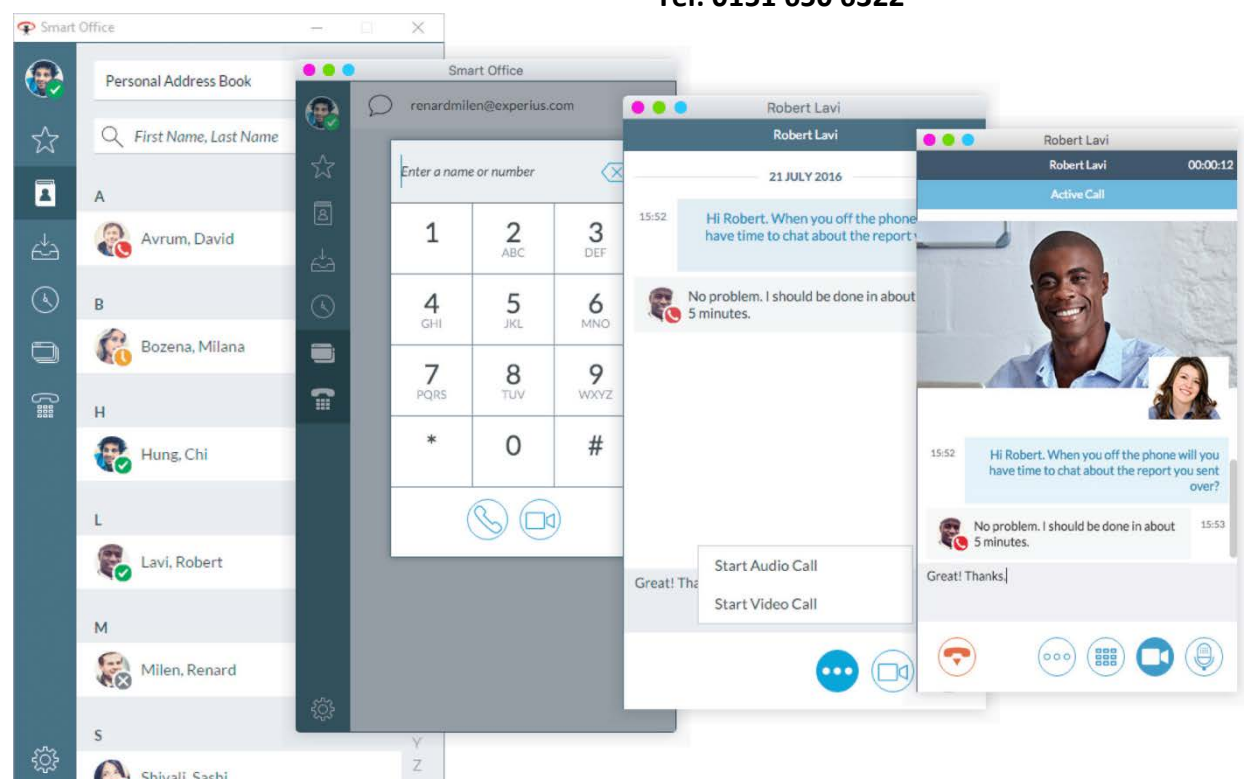

Find co-workers using the built-in corporate directory, see their presence status, send/receive instant messages and make/receive voice and video calls. The client shares your business phone number, even if you also have a desk phone and/or a mobile client.

Business Value

- Extends UC functionality to virtually anywhere

- Point-to-point video

Conferencing & Collaboration

- MeetMe Audio Conferencing
- Smart Office Screen Share
- Smart Office Collaboration

Access Voicemail from Any Device

There is nothing revolutionary about voicemail, but that doesn't mean it can't be better than you expect. Temovi Cloud offers voicemail as well as fax messaging from one number; making it easy to stay focused on the task at hand.

Temovi Cloud offers far more than just traditional touch-tone commands; a web portal, email and mobile access (optional) make it easy to re-connect. Optional transcription (voice to text) makes it easy to read and respond to messages without ever picking up the phone.

Temovi Cloud voicemail can also be purchased as a separate service, an ideal solution for large organisations that want to extend the life of their premises-based PBX and don't want to invest in a replacement for their end of life/support voicemail system.

Temovi Cloud integrates with most PBXs and its cloud economics mean you'll typically pay less for Temovi Cloud mailboxes than maintenance costs for your outdated v-mail system. Pay less – get more, that's Temovi Cloud.
