

Digitel Press Release – 14/02/2018

Digitel Launches Biznet Initiative with Wirral Chamber of Commerce

Digitel is partnering with the Chamber of Commerce in creating the Biznet community in order to enable Chamber members to communicate and collaborate more effectively with each other and the world beyond. Chamber members are invited to join the exclusive Biznet Community and by doing so will have access to state-of-art technology, special offers, tools and resources.

With Wirral Chamber membership now in excess of 700 the Wirral Chamber member ecosystem has a collective turnover approaching £250 million. If we are to collectively realise the potential of the Chamber ecosystem the importance of effective communication and collaboration between Chamber members is critical.

Biznet membership will offer the ability to improve margins, streamline costs and drive growth in businesses by simplifying the way members interact with one another. Digitel will offer Chamber members access to unified communications tools delivered from our carrier-grade, cloud-based Temovi Platform.

The primary objectives in designing the Biznet community network is to provide a network that enables Chamber members to leverage the potential of the Wirral Chambers collective membership and in so doing increase their operating efficiency and profitability of its members and make the Wirral Chamber of Commerce the most interconnected Chamber in the UK.

The world is already connected:

- 1.3 Billion Mobile Workers.
- 50% Apps Deployed from the Cloud.
- Video is now the number one preferred communication tool.
- There are 6 connected devices for every human on the planet.

Cloud-based Unified Communication (UC) isn't a thing of the future anymore! It's transforming business right now, all around the world, and companies can either embrace the change or be left behind.
